

BRUNO BIGNARDI

Summary

I knew from the day I wrote my first line code I was hooked. I became passionate about programming, mastering problem solving, the ability to learn quickly and always stay on top of technologies. I am looking for the right opportunity to develop my career.

At the bottom you will find my recent projects that showcase my skills in front end development.

SOME PERSONAL PROJECTS

• **To-do-List - JavaScript + SQL**

A project created to practice integration with database.

The application consists in a log in system with a form that leads to a simple CRUD to-do list where the data are stored on the local cache.

• **My comment App - React**

It's an application fully developed on React with JavaScript (JSX) and it's basically a simple app which the user can add and remove comments. On the application it was implemented classes, state and external node packages such as sweetalert.

• **Organo - React**

Organo is an application built on React made to register and expose the contributors of a Brazilian IT school with their respective name, occupation, images and teams.

All components applied for a user-friendly interface and dynamic cards that react different depending on the team chosen.

• **React Studies - React TypeScript**

An application to control tasks to be done with a timer. Built with create react app, applied with TypeScript. On the app external packages were applied such as uuid, SASS, switchalert.

• **Tell Me A Joke - React TypeScript**

That is a very simple application that throws a new joke on the screen on every button click. On the project it was used Axios to get the jokes out of an API.
